

BEFORE
THE PUBLIC SERVICE COMMISSION OF
SOUTH CAROLINA
DOCKET NO. 2005-270-G - ORDER NO. 2007-475
JULY 16, 2007

IN RE:	Request for Investigation to Determine)	ORDER REQUIRING
	Whether a Regulation Should Be)	SEMI-ANNUAL FILING
	Promulgated Requiring Relocation of Certain)	OF STATUS REPORTS
	Meter Sets or Installation of Splash Guards)	
	on These Meter Sets)	

This matter before the Public Service Commission of South Carolina (“Commission”) concerns the issue of filing status reports regarding the remediation or replacement of Type 12 gas meters in Docket No. 2005-270-G. Commission Order Nos. 2006-168 and 2006-310 in this docket addressed the filing of these status reports but were ambiguous about the frequency of submitting them to the Commission. According to the South Carolina Office of Regulatory Staff, some gas systems do not expect to complete their remediation or replacement of Type 12 meters until 2010, giving rise to concern about the pace of taking preventative measures with these meters.

The remediation or replacement of Type 12 Meters have public safety implications, and this Commission may find the need to consider measures that will maintain focus on the expeditious remediation or replacement of those meters by the regulated community in South Carolina. Therefore, in order to better monitor the progress of such remediation or replacement, we order that gas systems are required to file semi-annual status reports about the progress they are making to begin thirty (30) days from the date of this order. These reports will continue until such time as the

Commission determines that the status reports are no longer necessary or the frequency of the reporting needs to be changed.

This Order shall remain in full force and effect until further order of the Commission.

BY ORDER OF THE COMMISSION:

G. O'Neal Hamilton, Chairman

ATTEST:

C. Robert Moseley, Vice Chairman

(SEAL)
